Dear Hiring Manager,

A distinguished Senior Software Engineer with over 13 years of comprehensive experience in IT Project Management, Software Development, and Business Intelligence (BI) Reporting. Specializing in .NET technologies, Blazor, and MVC frameworks, I have a proven track record of delivering high-impact projects that align with organizational goals and drive operational efficiency.

With expertise in overseeing full project lifecycles, from strategic planning and requirement analysis to execution, delivery, and post-implementation support, I excel in IT Project and Operations Management. I am an Agile Scrum certified and proficient in using project management tools like Asana, which enables me to manage projects with precision and agility. My extensive experience in developing robust applications and portals using .NET technologies ensures scalability and performance, while my skills in database management, Oracle HRMS techno-functional development, and BI reporting using Microsoft Power BI are focused on optimizing system performance and delivering actionable insights.

I am adept at maintaining and enhancing applications and websites to meet evolving business needs and proficient in developing SharePoint sites and integrating complex systems to drive seamless collaboration across platforms. My competence in managing server infrastructure ensures stability, security, and optimal performance.

Throughout my career, I have successfully led and managed cross-functional teams in delivering complex IT projects within scope, time, and budget constraints. By applying strategic project management, innovative software solutions, and advanced BI reporting with Microsoft Power BI, I have enhanced operational efficiency and fostered strong stakeholder relationships, ensuring alignment of IT initiatives with business objectives.

Sincerely,

Shahid Hamsa
